

Advanced Reconciliation Training

Let us show you how to find more money!

We understand that an accurate and timely reconciliation is a key component of running a tight, profitable business. Proper reconciliation can be time consuming, costly, confusing and frustrating.

In fact, many wireless retail owners don't reconcile their commissions at all, missing out on hard earned commission revenue. Some wireless retailers still resort to using manual processes, which are extremely tedious, time consuming and error prone.

Our Reconciliation Experts can train your employees to understand and maximize RQ's reconciliation tools to:

- Accurately find commission revenue owed to your company, in a timely manner.
- Help detect possible employee fraud.
- Ensure sales associates are being charged back accurately.
- Tune up your financial reporting.

Our service includes:

Interactive, hands-on training with one of our Reconciliation Specialists that includes: Three training sessions to take place over a three-month period (through three commission cycles).

Session 1 – Employee(s) will actively observe as our Reconciliation Expert reconciles your company's commissions.

Session 2 – Employee(s) will work together with our Expert to reconcile your company's commissions.

Session 3 – Employee(s) will reconcile your company's commissions with our Expert shadowing during the process.

How much does this service cost?

The cost is dependent on the hours accrued for the work. The hourly rate is \$200 per hour for each hour our Expert is engaged with your employees. We anticipate the average engagement for this service to be 5-9 hours over the course of three sessions. However,

time may vary based on the experience level of the employees being trained, as well as the complexity of your carrier's commission structures.

Customized training available: This training can also be customized to fit your individual company's goals. You can use a combination of the three options that best fit your needs.
