

DigitalPersona Fingerprint Biometric Solutions and iQmetrix Retail Management Solution, RQ⁴

DigitalPersona biometric solutions replace the use of passwords and swipe cards with fingerprint authentication. Employees can no longer share user names, passwords and swipe cards. Use of biometrics increases user accountability and is a proven deterrent to committing fraud. Fingerprint authentication:

- Prevents "buddy punching" and decreases payroll fraud
- Requires management fingerprint authentication for all overrides, voids and discounts
- Speeds user logon
- Supports RQ4 Screen Lock
- Return on Investment (ROI), typically 4-6 weeks

The DigitalPersona U.are.U[®] Fingerprint Reader is used in over 90% of the biometric POS terminals on the market today.

"With the use of DigitalPersona U.are.U Fingerprint Readers and RQ4 iQmetrix software, managers and employees are held accountable for their transactions. Biometrics has eliminated unauthorized management overrides and has stopped time and attendance fraud, resulting in a positive effect on revenue."

Todd Keeler

Director of Special Programs
Five Star Cellular

"DigitalPersona U.are.U Fingerprint Readers and RQ4 iQmetrix software have provided us with a savings of more than \$10,000 per month by eliminating payroll fraud due to buddy punching. Our return on investment was achieved in less than two months."

Srinivasa Tadipatri

IT Director
Arjay Wireless

"The combined DigitalPersona and iQmetrix solution enables us to drive down our labor costs by reducing buddy punching. The U.are.U solution has proven very rugged and reliable. The devices are quick to recognize fingerprint scans."

Brennan Salassi

IT Manager
Prime Communications

"It's nearly impossible to police the issue of buddy punching in a distributed retail environment without a system that enables greater accountability. DigitalPersona's fingerprint biometrics have proven to be a great solution. Since deploying U.are.U Fingerprint Readers, we have seen payroll fraud drop significantly."

Sarah Cuartas
